# Avery Weigh-Tronix Floor Scales

Mild steel floor scales  
suitable for every  
application.

**Reliable. Accurate. Built to Last.**

## Floor Scales

# Avery Weigh-Tronix

# Avery Weigh-Tronix

*Avery Weigh-Tronix offers some of the best floor scales in the world – robust, accurate and built to last. With over 200 years of weighing industry expertise behind them, the floor scales are designed for maximum strength and flexibility and are suitable for every application. Avery Weigh-Tronix floor scales are easy to install, use and maintain, so they won't slow your business down.*

MaxDec

DS

## High quality floor scales for every application

### Full Side Load Protection

*Once bolted to the ground the unique chain link design used on the DS, Max Dec and the LP range, makes bent feet and damaged loadcells a thing of the past. These scales are very low maintenance due to their ability to allow the top deck to swing out of the way, taking all the side forces away from the weigh bars.*

### Built for strength and reliability.

Avery Weigh-Tronix offers some of the most robust floor scales in the world — designed to perform well within the yield strength of the steel used. The virtually indestructible DS and MaxDec models utilize a unique self leveling chain link design, ideal for the harshest environments. The lower profile models (LP, ProDec and H Dec) are designed for superior deck strength, reducing deck deformation when constantly loaded and unloaded.

### Built for accuracy.

Avery Weigh-Tronix floor scales can deliver exactly the accuracy you require for your particular application. Scales are fitted with our patented Weigh Bar®, which allows the scales to remain accurate to 5,000 divisions while providing outstanding side/end loading protection and shock loading protection, common in most industrial environments.

### Built for easy loading.

All Avery Weigh-Tronix floor scales are available with ramps to allow loads to be driven or wheeled on easily and safely. The ProDec and Deck Scale can also be pit mounted for situations where space is an issue. The LP, low profile scale and the drum weigher, are designed to be low to the ground, and do not need to be pit mounted, minimizing installation time and allowing the scale to be moved when requirements change.

## Avery Weigh-Tronix

HDec

ProDec

Low Profile

## Built for safety.

Avery Weigh-Tronix floor scales are also designed with workplace safety in mind. The non-slip scale surface and feet, combined with the low profile or pit mounted options, ensure that the loading, weighing and unloading processes are as risk-free as possible.

## Built for every application.

From small (24" x 24") to large (96" x 72") and all the way up to 50,000 lb capacity, there is an Avery Weigh-Tronix floor scale for virtually every application. If one of our standard sizes doesn't work, the unique design of the ProDec allows us to supply it in custom sizes, for special applications or existing pits.

## Built to last.

From the tough, anti-slip safety tread plate to the hard wearing powder coat finish, Avery Weigh-Tronix scales are built for today's unrelenting industrial environments. A rugged design, to the highest quality standards, means that you get great value for money, no matter your budget or application.

**Avery Weigh-Tronix**

## The Avery Weigh-Tronix Weigh Bar® Accuracy and strength in one unique package.

The Weigh Bar® is designed to overcome the shortcomings of the load cell and to provide the user with a rugged, highly reliable and linear load sensing device at a reasonable cost.

- NTEP approved to 5000 d
- Immune to side loads, end loads and twisting
- Inherent strength and overload protection in the design with gauges on the outside of the bar
- More robust than a shear beam load cell for a given output
- Lower failure rate versus load cells; less prone to damage from impact and maximum design protection from vibration

Failure Rate of Weigh Bar® vs. load cells
