

Portaweigh II

A Hytronic™ Portable Truck Scale

**Spend your money
for this truly
portable truck scale,
and you'll never
have to worry about
spending another dime
because of water or
lightning damage.**

If you're in the construction or materials business today, you have plenty of things to worry about. But your truck scale doesn't have to be one of them. Not if you buy a Winslow Portaweigh II.

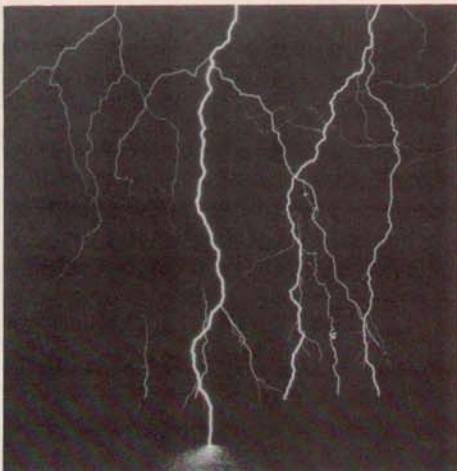

Never worry about delays or difficulties when you want to move your scale.

Because with Portaweigh II you have the only truly portable truck scale available today. Since it's totally self-contained, including a factory-installed deck, you can move it from job site to job site with little delay or difficulty.

Set-up and take-down are no problem either. No on-site assembly is required. So once you arrive at your new job site, you set your scale at grade level by simply bolting it to inexpensive concrete footings. Then connect your instrumentation. Since Portaweigh II is factory-calibrated, you're ready to start weighing.

No other scale can be moved and be made ready to use as quickly or easily as Portaweigh II. Furthermore, with its 24" profile, it is the lowest portable truck scale available, making it especially suitable for use with portable plants.

But even more, with this scale you have Winslow Hytronic technology working for you, which eliminates a lot of problems other truck scales can give you.

Even these bolts can't drive your Portaweigh II nuts because lightning can't damage the hydraulic load cells in a Hytronic Scale.

Even under all this water your Portaweigh II won't be washed up because water can't damage the hydraulic load cells in a Hytronic Scale.

Never worry about lightning or water damaging or destroying your load cells.

With the Portaweigh II Hytronic Truck Scale, we utilize totally non-electric load cells. Unlike electronic load cells, they cannot be damaged or destroyed by lightning or water. So no matter how bad the thunderstorm, you never need be concerned about lightning or flooding causing time-consuming repairs or costly replacements.

In fact, we guarantee you'll never spend a dime to buy replacement load cells because of damage from water, lightning, or stray voltages. That's peace of mind no electronic truck scale manufacturer can give you.

Never worry about replacing your load cells because of normal wear and tear for 10 years.

Furthermore, with our stainless steel hydraulic load cells, we give you an unmatched warranty that says we'll replace your load cells for up to 10 years if they should ever fail because of defective materials and workmanship, or even if they are damaged due to normal wear and tear. No other scale you can buy comes with that promise. But then again, no other scale has load cells as durable

or reliable as the ones in a Portaweigh II Truck Scale.

Never worry about temperature fluctuations affecting accuracy.

Even extreme climates can't stop this scale from weighing accurately for you. Because we've engineered the load cells with technology similar to that used in the complex, hydraulically actuated controls of modern jetliners, which like your scale must perform reliably in sub-zero temperatures. So the truth is, you can count on Portaweigh II to operate properly in temperatures as hot as 200°F or as cold as -90°F. That means whether you're in Alaska or Death Valley, Portaweigh II can do the job for you.

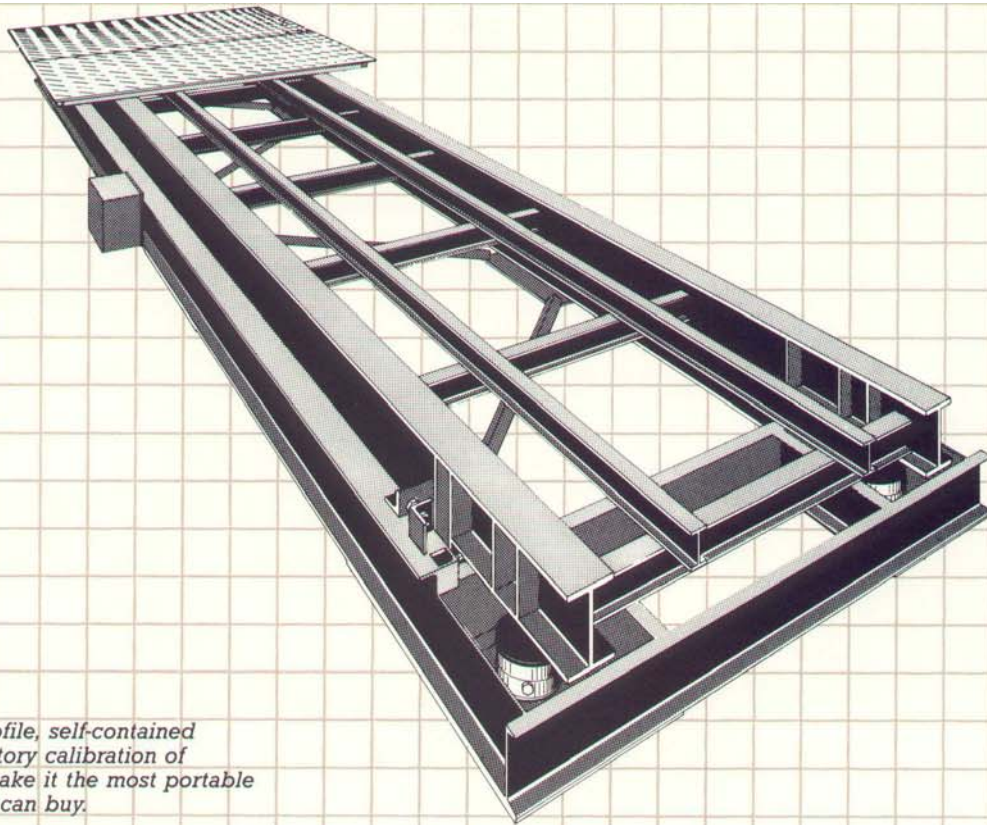

A Winslow hydraulic load cell can give you accurate weighing in temperatures as hot as 200°F or as cold as -90°F.

Never worry about a costly overhaul of your truck scale.

But until now we've just been telling you how the Portaweigh II Scale is superior to electronic scales. Fact is, it also has important advantages over mechanical scales too. For unlike mechanical scales, Portaweigh II will never need to be periodically overhauled. Because there are no moving parts, like pivots and bearings, that can wear out and require replacing.

Hytronic engineering makes Portaweigh II virtually maintenance-free and means using it

The low 24" profile, self-contained design, and factory calibration of Portaweigh II make it the most portable truck scale you can buy.

for your weighing needs can save you a lot of time and money.

Never worry about finding a better portable truck scale.

You can't. Because only the Winslow Hytronic Portaweigh II gives you all this:

- True portability.
- Totally self-contained design.
- Pitless installation.
- Factory-installed steel deck.
- Factory calibration.
- Simple take-down and set-up.
- The lowest profile available in a portable truck scale, only 24".
- Stainless steel hydraulic load cells rated at 60,000-pound capacity per cell with a 300% overload capability.
- Self-centering load cells requiring no check rods.
- The most advanced electronic indicators, printers, and scale terminals available.
- Meets or exceeds the requirements of NBS H-44 for commercial truck weighing.
- An **unmatched LIFETIME warranty** on load cells against

damage by lightning, stray voltages, and water.

- An **unmatched 10-YEAR warranty** on load cells against defects in materials and workmanship and even damage due to normal use.

Moving your Portaweigh II from job site to job site is no hassle because take-down and set-up are simple.

So when you're ready to take care of your weighing needs, talk to the dealer who gave you this brochure or write:

Winslow Scale Company
P.O. Box 1523
Terre Haute, IN 47808
(812) 466-5265

Because no other dealer or company has a scale that can take away so many of your worries as Portaweigh II can.

Takes A Load Off Your Mind.

Standard Equipment

Series 136 Stainless Steel Load Cells
Capacity—75,000 lbs.

WS-210 Ticket Printer

Dot matrix, time and date, battery back-up, adjustable character size, automatic document advance, 10 selectable operating modes.

WS-1010 Digital Indicator

Microprocessor-based with auto tare, zero tracking, center of zero, BCD and 20 mA serial outputs, motion detection, internal lb/kg switch.

Options

Scale Terminal
Remote Scoreboard
Signal Lights
Load Out Systems

Portaweigh II Platform Sizes and Capacities

Model No.	Gross Capacity	Modules	Load Cells	Platform Size
52-4025	40	1	4	25' x 10'
52-4030	40	1	4	30' x 10'
52-4035	40	1	4	35' x 10'
54-6050	60	2	8	50' x 10'
54-6060	60	2	8	60' x 10'
54-6070	60	2	8	70' x 10'
56-10090	100	3	12	90' x 10'
56-100105	100	3	12	105' x 10'
58-100120	100	4	16	120' x 10'
58-100140	100	4	16	140' x 10'

Portaweigh II combines fully self-contained modules of 25', 30', and 35' lengths. Each module is calibrated and ready for installation. Standard models are designed for use with legal highway loads. Portaweigh II is available in special sizes and capacities for use with off-highway vehicles.

LIFE/10 WARRANTY

- LIFETIME warranty on Series 136 hydraulic load cells against damage by lightning, stray voltages, and water.
- 10-YEAR warranty on Series 136 hydraulic load cells against defects in materials and workmanship and damage due to normal use.

Compare the Winslow Hytronic Truck Scale Warranty with any electronic truck scale warranty. Winslow wins every time! So when you're ready to buy a truck scale, be sure you talk to the dealer who gave you this brochure.
