

Hauling optimum loads is the most direct route to maximum profitability. The Precision Load digital on-board weighing system will take the guess work out of the equation.

We make it simple. The uncomplicated, user-friendly cab mount display unit is compact and powerful. The digital sensors are manufactured in a certified "clean room" environment to strict ISO 9000 standards. That extra attention to quality control makes life simpler for owners and operators: less wasted time and money spent on downtime and service calls.

Rice Lake Weighing Systems is an international leader in the manufacture and distribution of weight-related products and process-control equipment. Within this ISO 9001 registered company, progressive new technologies merge with the wisdom of industry experience and create the future of weighing through cutting-edge research and design.

Our roots are planted firmly in the principles of quality and customer service. Through three generations of family ownership these ideals remain unchanged. Today, Rice Lake Weighing Systems is world renowned for delivering the highest standard of product and the best service in the weighing industry.

We continue our dedication to being the best by every measure—from community involvement to global commitment, and the promotion of ethical business practices that represent the values of our customers, our employees and our company.

# The Precision Loads On-Board Weighing System

for tractor trailer rigs: rigid or tipping straight trucks, liquid or dry bulk measurement

The Precision Loads On-Board Weighing System can be mounted in a variety of ways to fit your vehicle and adapt to your system operating requirements. We will help you select the right options for all your tractor/trailer vehicles. For liquid and dry bulk trailers, we offer sensor options for pivot point, leaf spring and air-ride suspensions.

Our simple, step-by-step installation manual guides the installer through the sensor mounting process to ensure optimum safety and precision of the weighing system. Add to that our five-year warranty against sensor breakage for a win/win, no waste, on-board weighing system every bulk hauler should have.

**9710 In-Cab Digital Indicator**

**Under-Body Mount Load Cell**

**Hinge Pivot Loadpins**

**Dual Sensor Air Pressure Transducer**

**Precision Loads™**  
RICE LAKE

The configuration of the Precision Loads On-Board Weighing System will include load sensors, single-sealed junction box, cab-mount display and all digital connections. Air ride suspension kits may also be included in system configurations as well as peripheral equipment; printers, GPS and data communications integration, limit alarms and several operating programs.

- Digital Read-out
- Digital Transmitter
- Air Transducer
- Load Cells

Sample configuration only. Alternative configurations are available.
